SUMMARY

Detail-oriented Data Analyst and BI Developer with extensive experience in data extraction, transformation, cleaning, validation, and dashboard development. Proficient in SQL, Power BI, Tableau, Python, and advanced Excel, with a proven ability to automate reporting workflows and deliver actionable insights. Adept at collaborating with stakeholders to improve data integrity and support informed decision-making. Committed to enhancing reporting reliability and driving business value through data-driven solutions.

WORK EXPERIENCE

Freelance Data Analyst & BI Developer, **Freelance**, Remote
04/2024 – 07/2026

- Spearheaded data analytics, business intelligence, reporting, dashboard development, data transformation, and workflow automation initiatives for clients across legal, e-commerce, fintech, cloud analytics, and IT sectors.
- Partnered with stakeholders to enhance data integrity, automate manual processes, and deliver reliable reporting critical for informed decision-making.

BI Developer, **Law Firm**, Remote
08/2025 – 07/2026

- Integrated Power BI reports with BigQuery datasets, leveraging Power Query and BigQuery views for data transformation tailored for reporting and dashboard development.
- Prepared, filtered, transformed, and validated datasets to bolster reporting reliability and consistency.
- Constructed and maintained comprehensive dashboards tracking firm-wide, attorney, and paralegal performance, encompassing case volumes, client recovery rates, Net Promoter Score (NPS), billing rates, and client acquisition metrics.
- Engineered executive KPI dashboards and generated recurring daily and weekly performance reports for leadership review and business intelligence meetings.
- Conducted thorough quality assurance checks across source data, transformed datasets, and dashboard outputs; meticulously documented reporting logic and processes.
- Collaborated with stakeholders to gather specific reporting requirements and elevate dashboard usability, utilizing Excel and Google Sheets for data preparation and validation.

Data Analyst, **E-Commerce**, Remote
01/2025 – 12/2025

- Compiled and consolidated e-commerce, customer, revenue, and marketing data to generate daily, weekly, and monthly reports.
- Cleaned, validated, and standardized datasets utilizing SQL and advanced Excel techniques.
- Developed insightful Excel and Google Sheets reports monitoring conversion rates, Return on Ad Spend (ROAS), Average Order Value (AOV), customer retention, revenue trends, and campaign performance.
- Automated routine reporting tasks using Python and Google Apps Script; extracted affiliate marketing data and employed web scraping to supplement campaign reporting.
- Analyzed performance trends and communicated actionable insights to marketing stakeholders.

BI Developer, **Enterprise Cloud Analytics**, Remote
05/2025 – 06/2025

- Queried, transformed, and validated enterprise datasets using SQL within Azure Databricks.
- Developed interactive Tableau dashboards and implemented data quality checks to ensure reliable enterprise reporting.

- Collaborated with stakeholders to define Key Performance Indicators (KPIs) and reporting requirements, while supporting improvements to the reporting pipeline.

Data Analyst, **Fintech**, Remote
04/2024 – 07/2025

- Annotated, validated, and structured financial datasets using Python and SQL to support reporting, research, and business analysis.
- Conducted ad hoc financial research and automated validation checks to enhance dataset consistency and accuracy.
- Documented reporting workflows and prepared standardized datasets for comprehensive analysis.

Data Analyst, **IT Company**, Remote
04/2024 – 11/2024

- Prepared operational datasets using SQL and Google Apps Script to support recurring reporting and dashboard requirements.
- Built dashboards visualizing sales performance, customer satisfaction, and churn metrics; analyzed trends and generated reports to inform operational decisions.

Administrative Assistant II, **City Government of Antipolo**, Antipolo City, Philippines
02/2023 – 08/2024

- Reviewed, encoded, and validated operational and financial records from multiple departments, ensuring completeness, consistency, and accuracy.
- Managed and cleaned Daily Time Records (DTRs) for personnel within the City Treasurer's Office prior to submission to Human Resources, verifying completeness and preparing them for HR processing.
- Conducted daily audits of collectors' receipts and supporting documentation; investigated discrepancies collaboratively with collectors and relevant offices.
- Consolidated validated records into summary reports and maintained organized digital and physical files in compliance with records management and data privacy practices.

Revenue Collection Clerk I, **City Government of Antipolo**, Antipolo City, Philippines
09/2018 – 02/2023

- Recorded daily revenue collections and transaction data within official government systems.
- Verified payment records against official receipts and supporting documents, reconciled daily totals, and prepared reports for financial reviews and audits.
- Handled and cleaned Daily Time Records (DTRs) for personnel within the City Treasurer's Office before submission to HR, ensuring records were organized and ready for review.
- Identified and rectified financial data discrepancies before final posting and retrieved historical records for audits and management inquiries.
- Maintained adherence to established government financial procedures and documentation standards.

EDUCATION

Polytechnic University of the Philippines – Open University System, **Bachelor of Public Administration, Public Administration**, Manila, Philippines
10/2023 – Present

Datamex Institute of Computer Technology, **Associate in Computer Science, Computer Science**, Antipolo, Philippines
06/2008 – 05/2010

SKILLS

SQL	BigQuery	Data Transformation	Data Validation
PostgreSQL	RDBMS Concepts	Data Cleaning	Data Quality Assurance
Microsoft SQL Server	Data Extraction	Data Standardization	Power BI

Tableau
Looker Studio
Power Query (M)
Dashboard Development
KPI Reporting
Executive Reporting
Trend Analysis

Ad Hoc Analysis
Advanced Excel (Pivot Tables, XLOOKUP, VLOOKUP, INDEX-MATCH)
Google Sheets
Python
JavaScript
Google Apps Script

Reporting Workflow Automation
Azure Databricks
Shopify Analytics
GA4
Docker
Superset
Git

Asana
Workato
Filevine
Reporting Documentation
Requirements Gathering
Stakeholder Support
Cross-Functional Communication

CERTIFICATES

Data Analysis Using Python
Python for Data Science

Data Science Foundations – Level 1
